

Material certificate

The media-contacting parts of the articles on the following pages are manufactured from stainless steel in combination with PTFE. They are all designed to have a smooth finish and to be internally crevice free. They can be easily cleaned in line with GMP.

The declaration for stainless steel is based on REGULATION (EC) No 1935/2004 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL. "The principle underlying this regulation is that any material or article intended to come into contact, directly or indirectly, with food must be sufficiently inert to preclude substances from being transferred to food in quantities large enough to endanger human health or to bring about an unacceptable change in the composition of the food or a deterioration in its organoleptic properties."

Stainless steel is in general widely used and suitable for most foodstuffs. If using highly corrosive or aggressive materials, please check our List of "Chemical-Resistance" :

https://www.buerkle.de/files_pdf/wissenswertes/chemical_resistance_en.pdf or contact us for suitability.

The declaration is based on our current state of knowledge and information provided by our supplier at the time that the document was drawn up.

The supplier - Bürkle GmbH in Bad Bellingen/Germany - is certified according to the standard DIN EN ISO 9001 by the DQS (German Society for Quality Assurance) since 1995. The number of the certificate is 2284-08.

13. August

Bürkle GmbH, Bad Bellingen,
